Dear Investor,

Enclosed is information about SteadyWare LLC, our exciting new company. Patented by SteadyWare, our utensils bring independence and a sense of normalcy back to the lives of millions by eliminating debilitating hand tremors while eating.

Our products are:

- noninvasive and self-contained,
- no batteries, moving-parts or other attachments,
- uniquely designed and patented by a U.S. inventor afflicted with Parkinson's,
- cost only 1/3rd of the price of our competitor,
- affordable for individuals, caretakers, and institutions

Each year 60,000+ Americans are diagnosed with Parkinson's. More than 10 million individuals have Parkinson's disease worldwide and there are an estimated 10 million individuals with Essential Tremors in the US alone. Evidence suggests that our products may also be beneficial for Cerebellar Tremors, Functional Tremors, Multiple Sclerosis, or veterans with a debilitating hand tremor.

We have created a unique opportunity to preorder utensils and invest in our company. Many clinics and care facilities are preordering packs of utensils to work with their clients. Our website is www.steadyware.com where you can view more information about our journey and groundbreaking designs. We would like to thank you in advance for helping us share the news about these unique and much needed products. Please don't hesitate to contact us should you have any questions.

Sincerely,

The Team at
SteadyWare LLC
